

Cleaning Equipment – Non skin penetration – Method 2

For equipment **not** able to be put into water (e.g. hair dryer and parts of electrical equipment)

Wash hands before and after cleaning equipment.

Use clean gloves when cleaning equipment.

Wipe equipment thoroughly with a disposable paper towel with warm water and detergent. Dismantle equipment where suitable.

Rinse water safe parts with warm water or wipe equipment with damp disposable paper towel.

Dry with a disposable paper towel or air dry.

Keep equipment clean and dry.
